Colour Hunting

- ✿ Choose something coloured.

You could choose a coloured pencil or crayon, a piece of coloured paper, or something you are wearing.

- ✿ Choose something that is quite a natural colour first - green, brown, pink, purple, blue or yellow. Avoid a very bright colour.

What have you chosen? /

- ✿ Now go hunting for something natural that is the same colour

You can try looking at the flowers and leaves of plants, the bark of trees, grass, water, and anything else that is part of your natural surroundings.

What did you find to match the colour?

/

Think of some words that describe this colour.

/

- ✿ Now try more unnatural colours - bright orange, turquoise or dark blue.

What have you chosen? /

What did you find to match the colour? Was it harder to find something this time?

/

Think of some words that describe this colour.

/

- ✿ If you are using coloured pencils or crayons, record the colours in these boxes.
